## TSUKI - TSUKI

er\_cd\_013

Format: CD / Sleeve

Releasedate: 15. 12. 2005

Everestrecords is proud to announce the release of TSUKI's debut self-titled album. The trio use acoustic instruments, everyday tools, live sampling, and analog/digital technology to bring you a live CD that is saturated with electronics. All 4 tracks are electro-acoustic improvisations that delight the ear through their unorthodox tones and unexpected turns. Noisy and mystifying sounds develop into subtle compositions while playful rhythms and dynamic drones invite the listener on a 45 minute journey into the extreme.

*(haun)*

„... A perfect example of the successful electro-acoustic Improvisation. Playful music runs - change with beautifully structured Freejazz, where the bass sometimes is even caressed with a fine or scouring brush. There is grunting, whispering and grumbling. Sounds at the edge of noise, always making sense and without apparent distraction. Above all, Koch's bass clarinet impresses us in relation to the bass and Rieben's masterly played percussion instruments.”
